I'm Turning Green - Review & Giveaway!

I do think it's good to teach your child the importance of taking care of the planet and what better way than talking to them, being the example and reading books about it? The Little Environmentalist newest book - "[I'm Turning Green](#)" is all about taking care of our planet.

"[I'm Turning Green](#)" is written from a child's perspective on things they can do to help the planet - turning off the water while brushing their teeth, turning the lights out when leaving the room, making compost and much more. It's an easy to read book for children that keeps their interest. My son actually liked how the little girl was turning more and more green through all the things she did. In the back was a little I spy section where you go back and find different things in the pages. That was a huge hit here and gave us a chance to talk about the items that we had to find. There are little facts on each page as well, to help even you learn something - I know I did!

This is the second book in the series, you can read the first Nature Discovery In My Backyard as well. Visit the website [The Little Environmentalists](#) to read more about the books, take a green challenge and learn more about the products. You can purchase these books at [Amazon.com](#) as well.
